

Index of Papers Published in AIAA Journal

Volume 5—January through December 1967

Issue	Pages	Issue	Pages
January	1-192	July	1217-13376
February	193-384	August	1377-1536
March	385-608	September	1537-1728
April	609-832	October	1729-1920
May	833-1056	November	1921-2112
June	1057-1216	December	2113-2304

TN, TC, and SA indicate Technical Note, Technical Comment, and Survey Article, respectively.

AUTHORS

- Abarbanel, S. S., Fisher, E. E., and Zwas, G. Trajectory of a rebounding detonation wave (TN) 820
- Achenbach, J. D. Vibrations of a viscoelastic body (TC) 1213
- Adams, James A. (see Lowell, Robert L., Jr.)
- Adelberg, M. Breakup rate and penetration of a liquid jet in a gas stream 1408
- Adkins, Richard L. (see Jones, David I. G.)
- Adler, B. K. (see Webb, H. G., Jr.)
- Agosta, Vito D. (see Seamans, Thomas F.)
- Albini, F. (see Rand, S.)
- Allen, Richard A. Total air radiation calculations and comparison with recent measurements (TN) 589
- Allendorf, H. Donald. (see Rosner, Daniel E.)
- Allentuch, Arnold, Brady, Kevin, and Kempner, Joseph. Long cylindrical shell under loads applied to a reinforcing ring 1863
- Altman, Manfred (see Ross, Daniel P.)
- Amazigo, John C. (see Hutchinson, John W.)
- Amick, James L. (see Hawk, Norman E.)
- Ananthachar, V. S. Time dilatation in relativity (TC) 2110
- Anderson, G. F. Tow cable loading functions (TN) 346
- Real gas effects on the time required for establishing a detached bow shock (TN) 366
- Anderson, Gerald M., Falb, Peter L., and Robinson, Alfred C. One-dimensional minimum-time rendezvous for a thrust-limited rocket (TN) 1017
- Anderson, J. E. and Eckert, E. R. G. Transpiration cooling of a constricted electric-arc heater 699
- Anderson, Thomas P. (see Scholz, Paul D.)
- Anderson, William J. Supersonic wind-tunnel tests of wavy-walled cylinders (TN) 595
- Armenakas, Anthony E. Propagation of harmonic waves in composite circular cylindrical shells. I: Theoretical investigation 740
- Aronowitz, L. (see Loeffler, A. L., Jr.)
- Arrington, J. P. (see Bertram, M. H.)
- Asher, Gifford W. A note on the effective degrees of freedom of a vibrating structure (TN) 822
- Ashley, Holt. Observations on the dynamic behavior of large flexible bodies in orbit 460
- Babcock, Wayne R. (see James, Robert N.)
- Babineaux, T. L. (see Horton, T. E.)
- Bacon, Merle D. and Bert, Charles W. Unsymmetric free vibrations of orthotropic sandwich shells of revolution 413
- Bailey, F. R., Rollins, L. R., and Iversen, J. D. Sonic-point convergence with the method of integral relations (TN) 1894
- Ball, Joseph E. Preliminary circular orbit from a single station of range-only data (TN) 2261
- Ball, K. O. W. Wall temperature effect on incipient separation (TN) 2283
- Barba, P. M. (see Kane, T. R.)
- Barber, John B. (see Emery, James C.)
- Barger, Raymond L. Sonic booms attributed to subsonic flight (TN) 1042
- Barnes, John W. (see Tang, Homer H.)
- Bartlett, Eugene P. (see Kendall, Robert M.)
- Bass, Bennett R. (see Webb, George R.)
- Bauer, Andrew B. Some experiments in the near wake of cones (TN) 1356
- Bauld, Nelson R., Jr. Dynamic stability of sandwich columns under pulsating axial loads (TN) 1514
- Baum, Eric and Denison, M. Richard. Interacting supersonic laminar wake calculations by a finite difference method 1224
- Baw, P. S. and Peskin, R. L. Density profiles in gas-solid suspension flow (TN) 815
- Becker, Herbert. Comment on "Dynamic buckling of cylinders under axial shock-tube loading" (TC) 192
- Beckstead, M. W. and Hightower, J. D. Surface temperature of deflagrating ammonium perchlorate crystals 1785
- and Price, E. W. Nonacoustic combustor instability 1989
- Beheshti, M. Absorption and scattering of radiation by solid carbon particles (TN) 809
- Behrens, Wilhelm. The far wake behind cylinders at hypersonic speeds. Part I: Flowfield 2135
- Beitch, Leonard. Shell structures solved numerically by using a network of partial panels 418
- Bellantoni, J. F. and Dodge, K. W. A square root formulation of the Kalman-Schmidt filter 1309
- Unidentified landmark navigation 1478
- Bendavid, Dror and Singer, Josef. Buckling of conical shells heated along a generator (TN) 1710
- Benenson, David M. (see Prelewicz, D. A.)
- Naehier, Carl H., and Gideon, John B. Oscillations of electric arcs in argon cross-flow (TN) 1517
- Benson, Arthur S. and Mayers, J. General instability and face wrinkling of sandwich plates—unified theory and applications 729
- Bera, R. Note on the buckling of linear viscoelastic columns of variable cross sections (TN) 604
- Berger, S. A. (see Pantano, Ronald)
- Berke, J. G. (see Seely, L. B.)
- Berman, David. Nonideal behavior of rotating gravitational mass sensors 1000
- Berman, Richard J. Ballistic coefficients for power law bodies (TN) 166
- Bershadar, Daniel (see Oettinger, Peter E.)
- Bert, Charles W. (see Bacon, Merle D.)
- Bertram, M. H., Weinstein, L. M., Cary, A. M., Jr., and Arrington, J. P. Heat transfer to wavy wall in hypersonic flow 1760
- Bethel, Howard E. On the method of integral relations (TN) 802
- Bevc, V. (see Horn, K. P.)
- Bickford, W. B. (see Warren, W. E.)
- Billingham, R. (see Sandri, R.)
- Bhandari, R. G. Large deflections of columns of variable flexural rigidity (TN) 1486
- Bleich, Gary. (see Moretti, Gino)
- Blumer, C. B. (see van Driest, E. R.)
- Bluston, H. S. Nonadiabatic temperature distributions behind detached shocks (TN) 2061
- Boddie, W. Lee (see Vermeulen, P. J.)
- Bogner, F. K., Fox, R. L., and Schmit, L. A. A cylindrical shell discrete element 745
- Borland, Christopher J. (see Schindel, Leon H.)
- Borucki, William J. Spectrographic observations of polycarbonate, polyethylene, and polyformaldehyde in a ballistic range, an arcjet, and a diffusion flame 1329
- Bos, Alan (see Zakkay, Victor)
- Bostick, W. H. (see Small, R. L.)
- Boughner, R. E. (see Deacon, H. J., Jr.)
- Bowditch, David N. A Langmuir calorimetric probe to determine average energy per ion in a tenuous plasma beam (TN) 362
- Bowman, J. E. and Clayden, W. A. Cylindrical afterbodies in supersonic flow with gas ejection (TN) 1524
- Bowman, R. L. (see Mirtich, M. J.)
- Boylan, D. E. and Potter, J. L. Aerodynamics of typical lifting bodies under conditions simulating very high altitudes 226
- Boynton, Frederick P. Highly underexpanded jet structure: Exact and approximate calculations (TN) 1703
- Bradshaw, P. Mixing-length velocity profile in boundary layers with transpiration (TN) 1674
- Brady, Kevin (see Allentuch, Arnold)
- Brandmaier, H. E. Radial space charge fields in electro-fluid dynamic generators (TN) 1037
- Bredfeldt, H. R., Scharfman, W. E., Guthart, H., and Morita, T. Boundary-layer ion density profiles as measured by electrostatic probes 91
- Brech, R. A. Studies on the effects of the interplanetary space environment on thermal-control coatings 1650
- Brigman, George H. and Sodek, Benard A., Jr. Applicability of partition functions at high temperatures (TN) 1192
- Brockman, P. (see Burlock, J.)

SUBJECTS

AERODYNAMICS, FLUID MECHANICS, AND PLASMADYNAMICS

Aerodynamic and Re-Entry Heating

- Convective stagnation-point heating for re-entry speeds up to 70,000 fps including effects of large blowing rates. Philip DeRienzo and Adrian J. Pallone (SA) 193
- Viscous nonequilibrium blunt-body flow. W. C. L. Shih and R. S. Krupp 16
- Convective and radiative heat transfer during superorbital entry. H. Hoshizaki and K. H. Wilson 25
- Influence of atmospheric composition on hypersonic stagnation-point convective heating. T. E. Horton and T. L. Babineaux 36
- Laminar convective heating and ablation in the Mars atmosphere. Joseph G. Marvin and Ronald B. Pope 240
- Symmetrical, equilibrium flow past a blunt body at superorbital re-entry speeds. W. Kuby, R. M. Foster, S. R. Byron, and M. Holt 610
- Approximate analytic solutions for nonsimilar boundary layers. Charles J. Ruger 923
- A multicomponent boundary layer chemically coupled to an ablating surface. Robert M. Kendall, Roald A. Rindal, and Eugene P. Bartlett 1063
- Dynamic stability wind-tunnel tests of a 10° cone with simulated ablation at $M = 17$. D. R. Moore, C. J. Stalmach, T. C. Pope, and J. E. Jenkins 1377
- Experimental results for massive blowing studies. R. A. Hartunian and D. J. Spencer 1397
- Heat-transfer measurements with a catalytic flat plate in dissociated oxygen. R. J. Vidal and T. C. Gollan 1579
- Heat transfer to wavy wall in hypersonic flow. M. H. Bertram, L. M. Weinstein, A. M. Cary Jr., and J. P. Arrington 1760
- Convective heating in regions of large favorable pressure gradient. Joseph G. Marvin and A. Richard Sinclair 1940
- Interpretation of asymptotic calorimeter measurements. L. W. Woodruff, L. F. Hearne, and T. J. Keliher (TN) 795
- Applications of similar solutions for calculation of laminar boundary-layer characteristics in the presence of a pressure gradient. Davis H. Crawford (TN) 799
- Surface mass addition into a turbulent boundary layer. R. J. Muzny (TN) 1029
- Transformation of hypersonic turbulent boundary layers to incompressible form. Ralph D. Watson and Aubrey M. Cary Jr. (TN) 1202
- Effect of uncertainties in transport properties on prediction of stagnation-point heat transfer. Thomas E. Horton and Dale W. Zeh (TN) 1497
- Correlation of $C(K)$ in the separated region using the Crocco-Lees method. Alexander R. Peters and Donald R. Haworth (TN) 1506
- Microsphere ablation in a free-flight range. D. J. Collins, W. K. Rogers, and D. K. Sangster (TN) 1684
- Erratum: "Transformation of hypersonic turbulent boundary layers to incompressible form." Ralph D. Watson and Aubrey M. Cary Jr. (TC) 2112
- Addendum: "Convective stagnation-point heating for re-entry speeds up to 70,000 fps including effects of large blowing rates." Philip DeRienzo and Adrian J. Pallone (TC) 2289

Boundary Layers and Viscous Flows

- Computer experiments related to chemical propulsion. Martin Sichel (SA)..... 1537
- Laminar, transitional, and turbulent flow with adverse pressure gradient on a cone-flare at Mach 10. Victor Zakkay, Alan Bos, and Paul F. Jensen Jr..... 201
- Law of the wall for turbulent boundary layers in compressible flow. H. Tennekes..... 489
- Heat and mass transfer at a general three-dimensional stagnation point. Paul A. Libby..... 507
- Interaction of surface chemistry and mass transfer in nonsimilar boundary-layer flows. S. W. Liu and G. H. Kuby..... 526
- Blowing from a porous cone or wedge when the contact surface is straight. George Emanuel..... 534
- Skin-friction drag of a constant-property turbulent boundary layer with uniform injection. Robert B. Kinney..... 624
- Approximate closed-form solutions for supersonic laminar separated flows. Wilbur L. Hankey and Ernest J. Cross Jr..... 651
- Transpiration cooling of a constricted electric-arc heater. J. E. Anderson and E. R. G. Eckert..... 699
- Structure of highly underexpanded transverse jets in a supersonic stream. Joseph A. Schetz, Paul F. Hawkins, and Harry Lehman..... 882
- Further experimental results for three-dimensional free jets. Nicholas Trentacoste and Pasquale Sforza..... 885
- Shock tunnel investigation of boundary-layer transition at $M = 5.5$. Kenneth F. Stetson and George H. Rushton..... 899
- Turbulent flow of an elasticoviscous non-Newtonian fluid. William D. Ernst..... 906
- Approximate analytic solutions for nonsimilar boundary layers. Charles J. Ruger..... 923
- Effect of upstream velocity profile on the free mixing of jets with ambient fluid. I. Wygnanski and O. Hawaleshka..... 1057
- A multicomponent boundary layer chemically coupled to an ablating surface. Robert M. Kendall, Roald A. Rindal, and Eugene P. Bartlett..... 1063
- Vortex phenomena in a conical diffuser. Kwan L. So..... 1072
- Laminar boundary-layer separation and near-wake flow for a smooth blunt body at supersonic and hypersonic speeds. Jean-Marie Grange, John M. Klineberg, and Lester Lees..... 1089
- Numerical solution of the boundary-layer equations. Egon Krause..... 1231
- Interaction of the wake from bluff bodies with an initially laminar boundary layer. G. R. Hall..... 1386
- Experimental results for massive blowing studies. R. A. Hartunian and D. J. Spencer..... 1397
- Generalized law of the wall and eddy-viscosity model for wall boundary layers. Gdalia Kleinstein..... 1402
- Solution to the binary diffusion laminar boundary-layer equations with second-order transverse curvature. N. A. Jaffe, R. C. Lind, and A. M. O. Smith..... 1563
- Incompressible, turbulent boundary layers with arbitrary pressure gradients and divergent or convergent cross flows. George L. Mellor..... 1570
- Heat-transfer measurements with a catalytic flat plate in dissociated oxygen. R. J. Vidal and T. C. Golan..... 1579
- Dynamics of heterogeneous reaction at a stagnation point. D. K. Winegradner and R. A. Schmitz..... 1589
- Effects of mass injection on compressible, three-dimensional, laminar boundary layers. Sang-Wook Kang, William J. Rae, and Michael G. Dunn..... 1738
- Turbulent boundary-layer separation in front of a forward-facing step. Edward E. Zukoski..... 1746
- Stability of compressible boundary layers. W. Byron Brown..... 1753
- Direct measurement of skin friction on a porous flat plate with mass injection. Harvey Dershin, Charles A. Leonard, and William H. Gallaher..... 1934

THERMOPHYSICS

Atomic, Molecular, and Plasma Properties

- Asymptotic theory of ellipsoidal electrostatic probes in a slightly ionized, collision-dominated gas. Ira M. Cohen 63
 Cooled electrostatic probe. Jerry Grey and Paul F. Jacobs 84
 Boundary-layer ion density profiles as measured by electrostatic probes. H. R. Bredfeldt, W. E. Scharfman, H. Guthart, and T. Morita 91
 Probe measurements of plasma rings injected into an axial guide field. R. L. Small, E. A. Valsamakis, and W. H. Bostick 853
 Shock tube side-wall electrostatic probes. J. T. C. Liu 891
 Experimental study of the dynamics of a large inverse pinch. M. A. Kolpin 1159
 Measurements of viscosity and thermal conductivity of partially ionized argon plasmas. A. Kanazawa and I. Kimura 1315
 Spectrographic observations of polycarbonate, polyethylene, and polyformaldehyde in a ballistic range, an arcjet, and a diffusion flame. William J. Borucki 1329
 A unified treatment of the relaxation phenomenon in radiating argon plasma flows. Peter E. Oettinger and Daniel Bershadner 1625
 Excitation and detection of magnetoacoustic waves in a rotating plasma accelerator. G. L. Wilson and H. H. Woodson 1633
 Measurements of the continuum and atomic line radiation from high-temperature air. George M. Thomas and Wesley A. Menard 2214
 Effect of a continuous absorber on spectral line-reversal temperature measurements. M. Lapp 2224
 A Langmuir calorimetric probe to determine average energy per ion in a tenuous plasma beam. David N. Bowditch (TN) 362
 Applicability of partition functions at high temperatures. George H. Brigman and Benard A. Sodek Jr. (TN) 1192
 Shock-tube performance of a langmuir probe suitable for ballistic-range applications. E. Locke and K. Plotkin (TN) 1350
 Mass flux and impact pressure probes for use in arcjet exhausts. Joseph C. Kroul (TN) 1503
 A probe for total-enthalpy measurements in arcjet exhausts. Donald W. Ecker (TN) 1504
 Thermodynamic considerations of droplets and bubbles. S. S. Penner and Ta Li (TN) 1528
 Electrical conductivity of high-void-fraction two-phase flow in an MHD generator: I. Experiment. G. H. Gelb, K. A. Sene, S. M. Zivi, and L. G. Neal (TN) 2094
 Electrical conductivity of high-void-fraction two-phase flow in an MHD generator: II. Analysis. Karl A. Sene (TN) 2097

Heat Conduction

- A finite-difference heat conduction method applicable during surface recession. Richard Eppes Jr. (TN) 1679
 Approximate solutions to phase-change problems. Thomas J. Lardner (TN) 2079
 Some heat conduction analyses using Kantorovich's method. D. J. Johns (TC) 191

Radiation

- Couette flow of a radiating fluid: Optically thick medium. Ira M. Cohen 78
 A modification of the differential approximation for radiative transfer. D. B. Olfe 638
 Radiation absorption in high-speed laminar boundary layers including the effects of external sources. Harold R. Jacobs 1337
 Technique for measuring absorptance and emittance by using cyclic incident radiation. John R. Jack 1603
 Semi-isotropic model for radiation heat transfer. C. S. Landram and R. Greif 1971
 Measurements of the continuum and atomic line radiation from high-temperature air. George M. Thomas and Wesley A. Menard 2214
 A method for two-dimensional radiation effect. C. K. Tsao (TN) 161
 Radiant heating of a rotating thick-walled spherical satellite. D. A. Prelewicz and Lawrence A. Kennedy (TN) 179
 Absorption and scattering of radiation by solid carbon particles. M. Beheshti (TN) 809

- Equilibrium radiative heating of shocked CO₂. H. J. Deacon Jr. and R. E. Boughner (TN) 1358
 Spectral radiances of model rocket exhaust gases at simulated altitude measured with a rapid-scanning spectrometer. Lothar Klein and Gunter J. Pensias (TN) 1690
 Thermal radiation effects in laminar boundary-layer flow. R. J. Tabaczynski and Lawrence A. Kennedy (TN) 1893
 Correction for radiation absorbed by electrically heated, wire temperature sensors in flames. C. R. Rein and J. R. O'Loughlin (TN) 1900
 Measurements of the total surface emittance of charring ablaters. Ronald B. Pope (TN) 2285

TRAJECTORY AND MISSION ANALYSIS

- Rapid convergence to optimum solutions using a Mip-H strategy. Robert G. Gottlieb 322
 Favorable thickness distributions for wings in supersonic flow. Toshio Kawasaki 439
 Quasilinearization determination of optimum finite-thrust orbital transfers. Gary A. McCue 755
 Elliptic orbit rendezvous. J. Tschauer 1110
 An approach to manual space navigation. Kenneth Nordtvedt Jr. 1185
 Attitude instability regions of a spinning symmetric satellite in an elliptic orbit. Frank B. Wallace Jr. and Leonard Meirovitch 1642
 Graphical analysis of singular trajectories for optimal navigation. Charles Arden Gaston 1655
 Sequential estimation of observation error variances in a trajectory estimation problem. Gerald L. Smith 1964
 Effect of solar perturbation on motion near the collinear earth-moon libration points. F. T. Nicholson 2237
 An approximate solution for ascending low-thrust trajectories without singularity. Yun-Yuan Shi and Martin C. Eckstein (TN) 170
 Optimization of a lateral turn at constant height. Michael Albert Connor (TN) 335
 Explicit guidance law for minimum fuel horizontal translation with bounded control. Jason L. Speyer and Arthur E. Bryson Jr. (TN) 340
 Contensou-Busemann conditions for optimal coplanar orbit transfer. Robert Dudley Culp (TN) 371
 Motion of a near-equatorial lunar satellite. Stephen H. Sandler (TN) 588
 Along-track oscillations of a satellite due to tesseral harmonics. G. S. Gedeon and O. L. Dial (TN) 593
 A reference orbit useful in integrating between activity spheres. Robert H. Flake and John Graham Hartwell (TN) 599
 Synchronous rotation of a satellite at less than synchronous altitude. G. W. Sutton and F. W. Diederich (TN) 813
 One-dimensional minimum-time rendezvous for a thrust-limited rocket. Gerald M. Anderson, Peter L. Falb, and Alfred C. Robinson (TN) 1017
 Second-order solution to the elliptical rendezvous problem. Edward A. Euler and Yechiel Shulman (TN) 1033
 A nonlinear correction method for orbit determination. William E. Hunt and Ali Hasan Nayfeh (TN) 1183
 An approach to manual space navigation. Kenneth Nordtvedt Jr. (TN) 1185
 An analytic treatment of cotangential transfer. H. Gardner Moyer (TN) 1197
 Low-thrust elliptic spiral trajectories of a satellite of variable mass. Martin C. Eckstein and Yun Y. Shi (TN) 1491
 Advantages of regularization in space dynamics. Victor Szebehely and David A. Pierce (TN) 1520
 Preliminary circular orbit from a single station of a range-only data. Joseph E. Ball (TN) 2261
 Time dilatation in relativity. V. S. Ananthachar (TC) 2110
 Comments on "Approximate analytical solution for satellite orbits subjected to small thrust or drag." Chong-Hung Zee (TC) 2111
 Reply by author to V. S. Ananthachar. M. Z. v. Krzywoblocki (TC) 2111
 Comment on "One-dimensional minimum-time rendezvous for a thrust-limited rocket." E. Levin (TC) 2112

VEHICLE DYNAMICS

- Modal method for analysis of free rotations of spacecraft. Peter W. Likins 1304
 On the dynamic characteristics of a variable-mass slender elastic body under high accelerations. Leonard Meirovitch and Donald A. Wesley 1439
 Extension of the second-order theory of entry mechanics to nearly exact solutions. W. H. T. Loh 1823
 A theory for nonlinear transverse vibrations of a partially filled elastic tank. Wen-Hwa Chu and Daniel D. Kana 1828
 Liquid motion in a circular cylindrical container with a flexible bottom. Pin Tong 1842
 A spin scale theory for rigid body integration using the Frick slip frame. P. Daniels and C. W. Ingram (TN) 168
 A theorem in rotational analysis. J. F. A. Ormsby (TN) 1345
 A note on re-entry vehicle roll resonance. D. H. Platus (TN) 1348
 Supersonic gust simulation experiments. Leon H. Schindell and Christopher J. Borland (TN) 1910
 Free-flight spin decay of a spin-stabilized shell containing a viscous liquid. W. T. Scott (TN) 2276
 Comments on "Effects of energy dissipation on a spinning satellite." Y. Pironneau (TC) 1374
 Reply by authors to Y. Pironneau. T. R. Kane and P. M. Barba (TC) 1375
